### WHO AM I?

I have 15 years of experience working as a software engineer. I've had the opportunity to collaborate with key players of the software industry by building software for the web, mobile devices, distributed systems, and cloud environments. I'm looking for positions to evolve my career and skills with the following stack: Golang, Python, Javascript, TypeScript, Angular, React, AWS, and Docker.

### TOP TECHNICAL SKILLS

**Languages** Golang, Python, JavaScript, TypeScript  
**Cloud (AWS)** Cognito, EC2, ECR, CodeArtifact, CodeBuild, CodeDeploy, CodePipeline, RDS  
**Databases** MSSQL, MySQL, MariaDB, Postgres  
**Frontend** ReactJS, Angular  
**CSS** Bootstrap, Tailwind  
**Other** Docker, Git

### EXPERIENCE

- 2/2021 – present  
Remote  
Part-time
- Front-end Engineer | DevOps Engineer** **Furukawa Electric LatAm**  
Working as a front-end engineer using Angular and building CI/CD pipelines. Key achievements:
- Built the authentication workflow using AWS Cognito.
  - Built the deployment pipeline using AWS cloud environment.
- Angular / AWS / Linux
- 11/2020 – present  
Remote
- Tech Lead | Golang Engineer** **BairesDev Inc.**  
Working with Abbott's US cloud solutions team (BairesDev's client). Key achievements:
- Reduced the overall system overload by splitting long-running operations into batches of smaller ones.
  - Improved the API security by identifying and fixing brute force attack vulnerabilities.
- Golang / Docker / EC2 / Python
- 8/2016 – 10/2020
- Sabbatical | Ph.D. Research | Trading Career**  
I took a professional sabbatical to improve my academic qualifications and apply my programming knowledge to other areas. Key achievements:
- Developed a 4-year Ph.D. research in the area of recommender systems where I had the opportunity to use Python (Pandas, NumPy, SciPy, and scikit-learn) to perform extensive data analysis and data visualization to build recommendation models.
  - Started a career in the financial market as a sole trader exploring algorithmic trading and building data analysis tools with Python.
- Python / Flask / Pandas / NumPy / Docker / Angular
- 6/2015 – 7/2016  
Manaus, AM, Brazil
- Senior Software Engineer** **IATECAM**  
Worked as a senior software engineer, full-stack web developer in web projects using Java, and PHP. Key achievements:
- Participated in key projects that helped the company to achieve the Level G of the MPS.BR, a QA certification program created by SOFTEX.
  - Helped to define source code comment styling and a branching model to track project features from requirements to source code using Git.
- Java / PHP / JavaScript / Angular
